

# Kornit Digital's patented digital printing process saves time and money.

Kornit's wet-on-wet process prints at production-level speed.

Other digital print solutions require too many steps—making them unworkable for industrial applications.

Separating pretreatment from printing is costly.

~\$0.50 per garment in extra consumables. 25-40% additional cost on same output:

- Labor time to pretreat and move inventory
- Energy to run additional machines
- Equipment investment
- Floor footprint space needed
- Work-in-process inventory
