

Metallic Cast Films

Specifications

Metallic Cast Vinyl Films—660 Series

These high-performance films feature excellent weathering and aging resistance, and are engineered for use over contoured surfaces and flat surfaces with rivets. This metallic-flake film creates a rich aesthetic appeal that accentuates recreational vehicle, fleet, marine, and automotive graphics and striping, architectural signage, decals, computerized sign making, and service station markings.

PROPERTIES

Adhesive	Permanent Solvent Acrylic
Liner	78# Bleached Kraft
Film, 60° Gloss	80 plus
Film Caliper, ±10%	2.0 mils
Outdoor Durability	5 years
Min. Application Temp.	40° F
Repositionable	Yes
Shrinkage and Gasoline Resistance	Excellent

SURFACES

- Flat
- Flat with Rivets
- Curved
- Corrugated
- Corrugated with Rivets

APPLICATIONS

- Recreational Vehicles
- Marine
- General Signage
- Automotive
- Automotive Aftermarket
- Fleet
- OEM

Pearlescent Cast Vinyl Films—650 Series

These brightly colored, polychromatic high-gloss films feature excellent opacity, a consistent color life, and uniform printability. They feature excellent weathering and aging resistance, and are engineered for use over contoured surfaces and flat surfaces with rivets. These films also are ideal for use in a wide range of applications, including automotive, marine, recreational vehicle, and computerized sign making.

Gemstone Metallic Cast Vinyl Films—640 Series

These films are designed for high-visual appeal and feature excellent surface gloss, color depth, and complete opacity. They offer superior cutability with conventional die-cutting and computer sign making systems, and are engineered for easy application over flat and contoured surfaces. These films provide dynamic graphic accents for recreational vehicle and marine applications, automotive aftermarket graphics and striping, trade show exhibits, and point-of-purchase displays.
